

Dashboard >Pages >Add New

Page can be saved as a draft or published, and make visible or password protected. The permalink (url) is displayed under page. New page will not display in navigation until it is added to menu structure (next page).

Continued on next page

To add new page to menu, locate in list of pages (on left), click Add to Menu. Drag and drop where it should display. Then, save menu.

Please be advised with this custom theme in place that you may want to consult developer (Apogee) before attempting on your own.
