

Dashboard >Events

Locate event and click to edit. Option available to search.

Continued on next page

Dashboard >Events >Hover mouse over event title to make cross arrows appear >drag event to position >Save (see screenshot below)

The screenshot shows the WordPress Events management interface. The left sidebar contains navigation menus for Dashboard, Analytics, Posts, Events, Media, Pages, Comments, Appearance, Plugins, Users, Tools, Settings, Easy Sign Up, Gallery, E-Mail, and Page Widgets. The main content area is titled 'Events' and includes 'Add New' and 'View Calendar' buttons. A notification bar at the top says 'Please configure your Google Analytics settings!'. Below this, there are filters for 'All (74)', 'Published (74)', and 'Trash (6)', along with a search bar and pagination controls showing '74 items' and '1 of 4' pages. A table of events is displayed with columns for Title, Author, Event Categories, Tags, Start Date, and End Date. The event 'PuppeTree Performance: The Ugly Duckling' is highlighted with a red box. A red callout box with a white background and black border points to a crosshair icon next to the event title, containing the text: 'hover mouse over event and arrow appears, move event to desired position'. Other events listed include 'One World, Many Rhythms: Native American Music', 'One World, Many Rhythms: Sitar', 'Music & Movement with Beth & Jodie', 'Crows Rule!', 'Sciencetellers: Super Heroes', 'Library Closed', 'Birds of Prey', and 'SRP Kick Off Party: Every Hero Has a Story!'.
